

Structurally very simple machine made of painted steel with wooden chipboard covered with edging made of aluminum all along, to eliminate sharp edges. The frame is made of two removable parts in order to adjust the height as desired and in a practical way.

Details:

- Diameter of working surface 1300 mm
- Washable circular surface with cover
- Absolute silence
- Quick adjustment of surface height from ground
- Extremely easy to use

Optionals:

- Circular surface with diameter on request
- Electronic speed regulator
- Rotating round guide H25
