

GENIUS AUTOMATIC NET LOADER

**AUTOMATIC
VERSATILE**

**LOADING MORE NET
EASY TO USE**

- Genius is an automatic machine for loading **extruded or knitted net either in bobbin or bale** on packaging-machine tubes.
- **It allows to completely eliminate down time** and any action of the operator in charge of the tube loading which, by positioning the tube and pressing a single button, starts the automatic cycle of the winder that will independently carry out the filling, collecting much more net with respect to traditional devices, remarkably increasing the autonomy of the combined packaging machine.
- **Ideal for:** net tubes of different diameters.

TECHNICAL FEATURES

- Auto-adjustment according to the tube diameter
- Absolute noiselessness
- Electro-mechanical and pneumatic drive
- Loading of tubes of any shape
- Allowed size: \varnothing min 70 mm; \varnothing max 260 mm; max length: 1800 mm
- Net anti-tangle device
- Solid structure
- Extreme ease of use
- Net-compression adjustment by means of inverter
- Maximum filling efficiency (30% with respect to traditional machines)
- Tube filling in about 5 minutes (standard length: 1300 mm)

OPTIONS

- Hard-unwinding-brush kit, for nets particularly rigid and resistant
